

TRASCAR - Warehouse Automations & Logistics Solutions

TRASCAR S.p.A. is in the sector of industrial automation, warehouse automation and logistics through all the intermediate phases of **palletising, warehouse storage picking, packaging to order and shipping** for over 38 years.

Started as a conveyor manufacturer,- TRASCAR S.p.A. has evolved specializing in palletizing and the consequent processing automatic warehouse storage and picking for shipment of whole or partial pallets. In large goods distribution logistic centres, the handling of goods must be carried out quickly, precisely and silently. Trascar Italy offers the complete automation equipment and solutions which interact and interlock the operators in charge of the picking and shipping functions along with labelling & bar coding of the packages and their traceability during the fast sorting.

Automatic warehouse handling system can be in multi levels for loading / unloading, to / from the stacker crane. Trascar has extensive experience in developing and producing customized automation lines for the customer. For this Trascar uses 3D preliminary studies at customer site to check the real feasibility of a certain solutions and trying to eliminate any problems that might arise.

Trascar **internally designs** and produces complete palletizing lines including the supply of the appropriate robot for each application, and development of applied software. Trascar provides the system on a "turn-key" basis complete with mechanical electrical automation and assembled at the customer site final commissioning and testing by their experts.

Operates in different market segments:

- Palletization
- Mechanical and foundry
- Food and beverage
- Plastic (No woven)
- Logistics
- Paper and packaging converting foils

Provides complete automatic handling systems for:

- Palletization
- Case and pallet handling
- Picking and packaging
- Palletising
- Storing and Retrieval of goods
- Handling supervision
- Data tracking
